Volume 10 1984 Table of Contents

No. 1 Chemotaxis

pp. 1–146

1. Cytological Observations

M. Bessis, A. de Boisfleury-Chevance: Facts and Speculation About Necrotaxis. (Chemotaxis Toward a Dying Cell) 5
Discussion 15

G. Haemmerli, H. Felix: Morphologic Aspects of the Leading Lamella in Locomotive Normal and Neoplastic Blood Cells. A Study by Scanning Electron Microscope (SEM) 23
Discussion 30

H.U. Keller, A. Morell, T. Schaffner, A. Zimmermann, U. Schaad: Impaired Neutrophil Locomotion Associated with Hyperadhesiveness in a Patient with Chédiak-Higashi Syndrome 37

H.U. Keller, H. Cottier: Comparison of Locomotion Chemotaxis and Adhesiveness of Rabbit Neutrophils from Blood and Peritoneal Exudates 45
Discussion 55

2. Physical Analysis of Chemotaxis

H. Gruler, B.D. Bültmann: Analysis of Cell Movement 61

B.D. Bültmann, O. Haferkamp, H.J. Eggers, H. Gruler: Echo-9 Virus-Induced Order – Disorder Transition of Chemotactic Response of Human Polymorphonuclear Leukocytes: Phenomenology and Molecular Biology . 79
Discussion 102

H. Gruler: Cell Movement Analysis in a Necrotactic Assay 107
Discussion 117

H. Gruler: Physical Bases for Defining Terms Used to Describe Cell Movement Phenomena 123

3. Pharmacology of Chemotaxis

M. Roch-Arveiller, J.Y. Drouin, F. Puisieux, J.P. Giroud: Direct Identification of Chemoattractant by a Visual Assay 129

M. Roch-Arveiller, J.P. Giroud: A Visual Technique for the Study of the Pharmacological Modification of Polymorphonuclear Chemotaxis 135
Discussion 142

No. 2/3 Controls of Hematopoiesis/Free Communications

pp. 147–518

E. Goldwasser: Erythropoietin and Its Mode of Action 147
Discussion 156

R.K. Shadduck, A. Waheed: The Role of Colony Stimulating Factor in the Regulation of Granulopoiesis 163
Discussion 172

A.J. Erslev, J. Caro: Secondary Polycythemia: A Boon or a Burden? . . 177
Discussion 185

D. Orlic, E. Kirk, F. Quaini, S. Babbott: The 2′–5′ Adenylate (2–5A) System in Erythropoiesis 193
Discussion 205

J. LoBue: Viral-Associated Alterations in Hematopoiesis in the Mouse . . 211
Discussion 219

S.J. Sharkis: The Role of the Thymus in Erythropoiesis 223
Discussion 227

R. Silber, R.L. Stahl, C.M. Farber, D. Kanganis, A. Astrow, L.F. Liebes: Chronic Lymphocytic Leukemia Lymphocytes: Membrane Anomalies and H_2O_2 Vulnerability 233

J.W. Fisher, M. Hagiwara: Effects of Prostaglandins on Erythropoiesis . . 241
Discussion 257

F.C. Monette, G. Sigounas: Factors Affecting the Proliferation and Differentiation of Clonogenic Hematopoietic Stem Cells in Vitro 261
Discussion 281

W. Fried, J. Barone-Varelas, C. Morley: Factors that Regulate Extrarenal Erythropoietin Production 287
Discussion 299

R.D. Lange, R.B. Andrews, D.J. Trent, J.P. Reyniers, P.S. Draganac, W.R. Farkas: Preparation of Purified Erythropoietin by High Performance Liquid Chromatography 305
Discussion 313

T.M. Dexter, E. Spooncer, R. Schofield, B.I. Lord, P. Simmons: Haemopoietic Stem Cells and the Problem of Self-renewal 315
Discussion 334

R.E. Pleomacher, A.H. Piersma, K.G.M. Brockbank: The Nature and Function of Granulopoietic Microenvironments 341
Discussion 363

P. Stryckmans, A. Delforge, R.B. Amson, J.P. Prieels, A.T. Telerman, C. Bieva, M. Deschuyteneer, E. Rongé-Collard: Lactoferrin: No Evidence for Its Role in Regulation of CSA Production by Human Lymphocytes and Monocytes 369
Discussion 387

H.E. Broxmeyer, P. Gentile, S. Cooper, L. Lu, L. Juliano, W. Piacibello, P.A. Meyers, F. Cavanna: Functional Activities of Acidic Isoferritins and Lactoferrin in Vitro and in Vivo 397
Discussion 416

C. Peschle, G. Migliaccio, D. Lazzaro, S. Petti, G. Mancini, A. Caré, G. Russo, G. Mastroberardino, A.R. Migliaccio, U. Testa: Hemopoietic Development in Human Embryos 427
L.G. Lajtha: Summary of Conference 443

Free Communications

B. Harrison, U. Reincke, M. Smith, S. Hellman: The Morphology of Hematopoietic Layers in Long-Term Cultures of Mouse Bone Marrow . . 451
T.D. Allen, P.J. Simons, T.M. Dexter: Commentary 467

M. Rosendaal, J. Adam: Haemopoiesis by Clonal Succession? 473
W. Redfearn: Statistical Appendix 481
H.S. Micklem: Commentary 487

T.W. Young, G.L.Keeney, B.S. Bull: Red Cell Fragmentation in Human Disease (A Light and Scanning Electron Microscope Study) 493
J.V. Dacie: Commentary 503

H.U. Keller, G. Meier, A. Zimmermann: Klinokinesis in Polymorphonuclear Leucocytes 505
G. Gerisch: Commentary 511
H. Gruler: Commentary 513
H.U. Keller, G. Meier, A. Zimmermann: Answer to Commentary . . . 517
